

Job Description of Python Developer for Apexon USA

Title: Python Developer

Location: Remote, USA

Job Description:

Python Developer:

Apexon is a digital-first technology services firm backed by Goldman Sachs Asset Management and Everstone Capital. We specialize in accelerating business transformation and delivering human-centric digital experiences. For over 17 years, Apexon has been meeting customers wherever they are in the digital lifecycle and helping them outperform their competition through speed and innovation.

RESPONSIBILITIES AND QUALIFICATIONS

- Strong programming experience with Python
- Should have exposure on CI/CD
- Hands-on Experience on SQL
- Nice to have OpenShift experience
- Should have ML/Operation experience
- Experience using databases and object-oriented design in python mandatory

The role requires developing object-oriented Python code to perform ETL jobs on Machine learning models. Some of the skills required in Python are,

- Experience with connecting to one or more databases from Python (Using sql alchemy, Pyodbc is a plus)
- Experience with data libraries like **Pandas, NumPy** (usage of standard operations on data frames like apply, group by and other transformational methods are common amongst this project at client)
- Knowledge of Object-Oriented Programming
- Familiarity with unit tests (Preferably with PYtest)
- Experience must be in Python 3.6 or above
- Knowledge of APIs using Python (Django, flask is a plus)

Experience: 3-12 years
